Metal samples and additional custom colors are available upon request. Please refer to the Stock Availability matrix for gauge, width, and paint finish availability.

Oil canning is an inherent part of light gauge cold-formed metal products and is not cause for coil, sheet, or panel rejection. Protective film must be removed immediately after installation. Color and sizes can change without notice. Additional sizes, gauges, and colors may be available, please contact your local sales representative for more information.

Colors represented on this electronic chart may not exactly match actual material. All colors should be verified using actual metal samples. Mismatch of electronic representations and actual material shall not be accepted as cause for rejection. Many finishes are production batch-specific and may result in slight variations in visual match. Do not mix or use materials purchased from separate sales orders on individual projects. Visual variation between separate order batches used on individual projects shall not constitute cause for rejection or claim.
